

## SUMMER UFO WAVE IN CRIMEA, south of Ukraine

Dr. Anton A. Anfalov, Crimean UFO  
Research,  
UKUFAS (Ukrainian UFO Research  
Association)

As we have established in many  
years of observations, UFOs appear  
over Crimean peninsula most every  
summer.

This summer was no exception.

Here are just a few cases from one  
of the hottest UFO-spots in Europe.

On Tuesday, June 14, 2005, at  
22:30 hours of Kiev time, local time  
(10:30 PM), numerous witnesses on  
the Southern coast of Crimea  
peninsula saw a brightly lit disk-  
shaped UFO, emanating bright-red  
light. The disk travelled midair at  
slow speed along the coastal line of  
the Black Sea near the town of Yalta  
and then began hovering over  
mountain Mogabi (804 meters above  
the sea level, straight southwest of  
Yalta, opposite Ay'-Petri mountain).

The disk then emitted two bright  
rays of the same red light, pointed  
towards the earth. After that, the  
UFO sharply zoomed up and  
vanished in the night sky. Local  
Yalta-based newspaper "Krymskiye  
Izvestiya" reported about that  
incident on June 22, 2005, since  
agitated witnesses telephoned them  
many times they had to report  
events.

It is not the first time UFOs have  
been reported hovering over these  
mountains.

UFOs were observed hovering over  
that mountain in 1990-1992 several  
times.

We believe that some kind of the  
alien nano - technological device  
(possibly, the alien beacon and/or  
the tracking device,  
gathering information) is installed  
into that mountain, so aliens visited  
it and took information by those rays  
or recharged the device. Mountain  
Mogabi is in very good place over the  
city of Yalta, with clear views of the  
surrounding areas.

It would be an ideal place to install  
such a device, perhaps for some kind  
of "alien espionage" to accumulate  
information. Maybe such devices  
(like alien "navigation and  
information beacons") are installed  
on other parts of our peninsula (like  
mountains Ayu-Dag, Demerdzhi-  
Nothorn, etc.). It is a fact that UFOs  
are often reported over these places.

On July 2 or 3, 2005, sometime  
after 11 PM Yuriy A. Pugachyev,  
Simferopol'-based UFO researcher,  
was observing the skies from his 5<sup>th</sup>  
floor balcony in Simferopol', saw a  
brightly lit object, emitting yellow  
light, moving across the sky,  
saturated by stars, from the  
southern coast of Crimea, over the  
city of Simferopol', the republican  
centre.

The witness is sure what he saw was definitely not a satellite or airplane, as the UFO was bright and moving in a zigzag trajectory.

The witness also emphasized he has seen several UFOs over the past few years from his balcony. 'I have seen this disk emitting bright yellow light from its bottom several times before.'

Numerous rumours circulate about ancient underground cavern bases, cities and tunnels, allegedly left from the times of "Atlantis" (that many believe used to exist in this region of Black and Azov Seas, near southern Ukraine and the Crimean peninsula, at least, part of "Atlantis"), some of which (some parts of this underground infrastructure) are still 'allegedly' used by aliens and UFOs from time to time.

Also there are firm rumours about "gateways" or "windows" to some parallel dimension on the Ay'-Petri plateau west of the town of Yalta (where numerous UFOs are regularly observed).

Sincerely,  
Dr. Anton A. Anfalov, Crimean UFO  
Research,
